

SUMMARY

Aspiring Software Development Engineer with a strong foundation in distributed systems, Go, and cloud-native architecture. Proven ability to deliver high-performance, scalable solutions through rigorous testing and efficient resource management.

TECHNICAL SKILLS

Languages: Go (Golang), Python, Java, SQL (PostgreSQL)

Backend & Systems: FastAPI, RESTful APIs, gRPC/Protobuf, Authentication (JWT/OAuth)

Cloud & DevOps: AWS (EC2), Docker, GitHub Actions (CI/CD), Git

Frontend: React, Tailwind CSS

TECHNICAL PROJECTS

TitanStore

Jan 2026 – Present

Personal Project · Go, SQL, Docker

- Architected a distributed key-value database in Go, implementing the Raft consensus algorithm to ensure high availability and data consistency.
- Engineered a custom binary Write-Ahead Log (WAL) with strict fsync durability, ensuring zero data loss and robust system reliability under failure conditions.
- Managed complex concurrency using Goroutines and sync.RWMutex, verifying thread safety and performance through extensive integration testing.

SFU Course Tracker (sfucourseplanner.me)

Nov 2025 – Jan 2025

Personal Project · Python, AWS, Distributed Systems

- Migrated platform infrastructure to AWS (EC2) and implemented Docker container orchestration to optimize deployment and reduce operational costs.
- Engineered a high-throughput scraping pipeline using Asyncio and HTTPX, achieving a 10x increase in data processing efficiency.
- Designed a normalized SQLAlchemy schema to store recursive tree structures, optimizing read performance for complex prerequisite queries.

Chain Reaction Game (GDCxCSSS Game Jam)

Jun 2025

Collaborative Project · C#, Unity, Git

- Collaborated in an agile team of 4 to prototype a physics-based game under a strict 10-hour delivery deadline.
- Implemented core gameplay mechanics using vector mathematics and raycasting to ensure responsive and high-quality player feedback.

EDUCATION

Bachelor of Science, Computing Science

May 2025 – Present

Simon Fraser University

- CGPA: 3.74 / 4.33
- Relevant Coursework: Discrete Math (A+), Computer Systems(A), Data Structures & Programming (B+), Linear Algebra(A-).

Associate of Science, Computer Science

Jan 2024 – Apr 2025

Langara College

- Completed foundational coursework in Computer Science and Calculus with distinction before transferring to SFU with advanced

WORK EXPERIENCE

Server · Pho Goodness Restaurant

Jan 2024 – Present

Burnaby, BC

- Successfully maintained a 3.74 GPA while working 20+ hours/week. This demonstrates the work ethic required for high-

- Streamlined operations for 100+ guests/shift by coordinating effectively with diverse teams under pressure.
