Hiring Manager
SBI Software

Re: Technical Support Developer

SBI's commitment to powering the green plant and nursery industry through a blend of technical support and active development is exactly the kind of challenge I seek. I am drawn to the opportunity to bridge the gap between client needs and software solutions, leveraging my background in computing science to ensure your partners' operations run seamlessly.

My technical background aligns well with your requirements. I have experience building RESTful APIs and managing data, notably with the SFU Course Tracker where I utilized FastAPI and SQLAlchemy to optimize complex queries. Furthermore, my work on TitanSwarm—integrating LangChain and Anthropic APIs to build a zero-hallucination RAG engine—demonstrates my proficiency with the AI-assisted workflows SBI prioritizes. Beyond coding, my experience as a server at Pho Goodness, coordinating for 100+ guests per shift, has equipped me with the communication skills necessary to diagnose and resolve client issues effectively.

I am eager to bring my problem-solving mindset and technical versatility to the SBI team. I look forward to discussing how my skills in API development and AI integration can support your clients and contribute to the continued growth of your applications.

Sincerely,

Zen Nguyen
